Description of event-

The benefits of plastic are undeniable. The material is cheap, lightweight and easy to make. These qualities have led to a boom in the production of plastic over the past century. We are already

unable to cope with the amount of plastic waste we generate, unless we rethink the way we manufacture, use and manage plastics. Ultimately, tackling one of the biggest environmental scourges of our time will require governments to regulate, businesses to innovate and individuals to act. Nevertheless, to tackle the roots of the problem, governments need to improve waste management practices and introduce financial incentives to change the habits of consumers, retailers and manufacturers, enacting strong policies that push for a more circular model of design and production of plastics. They must finance more research and development of alternative materials, raise awareness among consumers, fund innovation, ensure plastic products are properly labelled and carefully weigh possible solutions to the current crisis.

Description of event-

Rural India has been facing uncleanliness, unhygienic, malnutrition conditions and the most important problem is open defecation. Lack of awareness is noted among the villagers about such problems like health, cleanliness and diseases.

1. *Rally of health and hygiene*

Construction of toilets makes influence on their use instead of open places by the villagers. Due to such activities students also get aware about sanitization.

2. Cleaning (02-10-2019)

These activities among students make positively impact on health awareness and personal hygiene. Working together with other individuals, students learn to negotiate, communicate, manage, conflict and lead others. Such programmes sensitize the student towards the social issues and take challenges of the lesser privileged sections of the society.

3. <u>Door to door Importance of health, nutrition and girls' related issues (02-10-2019)</u>

Working outside the college campus and with diversified social groups of peoples allows students to gain more self-confidence, autonomy, and appreciation for others. These activities help them to become good leaders and well-mannered citizens.

He said that a lot of good work is being done under NSS, there is potential to do much more. NSS volunteers are young Indians and they represent the most dynamic and vibrant section of the Society. These are exciting times in India. The Government of India, under the dynamic leadership of Prime Minister, Shri Narendra Modi has embarked on the mission of building a united, strong and modern India – **"Ek Bharat, Shreshtha Bharat"**, following the principle of **"SabkaSaath, SabkaVikas"**. A number of path-breaking initiatives have been taken. 'Make in India' campaign has been launched to develop India as a global manufacturing hub. 'Digital India' initiative seeks to transform India into a digitally empowered society and knowledge economy. A nation-wide campaign to promote Digital Payments is underway. 'Skill India' has being launched to impart necessary skills to prepare Indians for the opportunities in Indian

economy as also the opportunities abroad.A number of initiatives, including Smart Cities Project, have been launched for developing infrastructure. **'Swachh Bharat Mission'** and **'Clean Ganga'** Mission have been launched for building a clean and green India. NSS volunteers can be contributors as well as beneficiaries of these initiatives. The programme design of NSS needs to constantly evolve to reflect the priorities of the Government and the nation. On this occasion Dr G.P. Gadekar (NSS Programme Officer), Dr A.M. Ghatole (Assistant NSS Programme Officer) along with 130 Students had actively participated in this event.
