Description of event- Initially, spitting in India was a response to chewing Tobacco or Gutka.

However, that is no longer the only reason since the past few decade. Off late, spitters simply spit mucus and saliva for no known reason.

Psychologically spitting has become more of a retro norm among people. People see it, they do it.

We all know the health hazards of spitting but even the educated seem to do so, for the simple reason of not caring at all.

Just because something is commonly practiced does not mean it can't be eradicated. Start today.

Change begins from a single person. That is YOU!

Stop TB. Stop Corona. Stop Corona. Stop Spitting.

Spitting Kills
